

## NSF CC-NIE Working Group Meeting

March 10, 2014

### Agenda

Time: 3:30-4:30pm, March 10, Monday

Location: UITS Library Subbasement Conference room

#### Agenda:

1. Status of the monitoring infrastructure
2. Update from CEN
3. Status of Science-DMZ equipment at Storrs
4. Update from UCHC
5. Next step
6. Open discussion on other issues

### Minutes

#### Present:

UConn: Bob, Bing, Jeff F., Richard (Jones)

UCHC: Jeff Dutton, Steve, Leo

1. Status of the monitoring infrastructure

Levon has been processing the throughput information gathered by the measurement points. Will summarize results and go over with Jeff and Bing later. Levon has also started to process delay measurements.

2. Update from CEN

Scott has two updates to provide to the team. " The first is we have a April 14th delivery date for the 100G DWDM optical equipment. The second is that the Internet2 100G agreement has gone through UConn Purchasing, UConn AG's office and the State AG's office is asking for some changes. Internet2 is working through the requested changes and hopes to return the agreement to the UConn to go through Purchasing, UConn AG, State AG workflow again. I'd guess we're still a couple of weeks away at the earliest from seeing this contract executed. Internet2 is still targeting 3 months from the execution of the contract to provide service pushing our 100G connection out to mid-June to early July. "

### 3. Status of Science-DMZ equipment at Storrs

Jeff said the team has made significant progress, and calls for a meeting involving the stakeholders. The goal of the meeting is to ensure the Science DMZ router to be ordered will satisfy the requirements of the research groups.

Bob mentioned the quote (12K) to install an optical fiber to the physics building.

### 4. Update from UCHC

Juniper router has arrived and will be set up.

### 5. Next step

Richard mentions that his team will decide whether to start the data challenge this Friday (3/14). The netflow equipment at UConn, however, has just experienced a failure.

### 6. Open discussion

Bing describes that UConn and UCHC are going forward with an IAM proposal.
