

NSF CC-NIE Working Group Meeting

September 8, 2014

Agenda

Time: 3:30-4:30pm, September 8, Monday

Location: Physics building, Conference room 403B

Agenda:

1. Status of measurement infrastructure and update on data analysis software
2. Update from CEN
3. Status of Science-DMZ equipment at Storrs
4. Update from UCHC
5. Next step
NSF annual report
6. Open discussion on other issues

Minutes

Present:

UConn: Bob, Richard, Bing

CEN: Mark

UCHC: Ion, Jeff D.

1. Status of measurement infrastructure
Reynaldo will wrap up his work in a final report; he will resume this winter.
2. Update from CEN

From Scott:

“We have all the Ekinops DWDM gear deployed and operational. We are still working on the cross connects from Fibertech for the last mile circuits to move the East Hartford location to Hartford. I am also expecting an update from Internet2 on an ETA for the 100G circuit delivery date.”

From Mark: Everything is going according to the plan. Not an easy way to do loadtest.

3. Status of Science-DMZ equipment at Storrs

Bob has finished a write up of the network infrastructure with updated topology and budget spreadsheet. Need more discussion within the network architecture group.

4. Update from UCHC

The 60Gbps Juniper firewall has been deployed. Will decide design on storage device gateway.

5. Next step

Bing will go over the current infrastructure writeup by Bob and the report to be submitted by Reynaldo, and start to work on the NSF annual report.

6. Others

Ion briefly described the status of the IAM proposal status.
