

NSF CC-NIE Working Group Meeting

November 24, 2014

Agenda

Time: 3:30-4:30pm, November 24, Monday

Location: Physics building, Conference room 403B

Agenda:

1. Status of measurement infrastructure and update on data analysis software
2. Update from CEN
3. Status of Science-DMZ equipment at Storrs
4. Update from UCHC
5. Next step
6. Open discussion on other issues

Minutes

Present:

UConn: Richard, Jeff, Bing

1. Status of measurement infrastructure

New PerfSonar nodes are still being tested. Hopefully will be ready before the winter break.

2. Update from CEN

From Scott: "CEN has moved the equipment in support of this from East Hartford to Hartford. I have not heard if UConn Purchasing has successfully amended the Internet2 contract to cover the cross connect fees to build the last cable in the 100G Internet2 circuit. I hope to hear news on that this week and an ETA for the circuit. I'm still expecting mid-December for the circuit."

3. Status of Science-DMZ equipment at Storrs

UITS has allocated substantial funding for updating the campus core and distribution network. This provides a total budget of around 1M in updating the overall network architecture; science DMZ can be designed to align much better with the update of the campus network architecture.
